**RE: NOTIFICATION OF PLANT CHANGES; OCCIDENTAL CHEMICALS CORPORATION,  
WICHITA PLANT; USEPA ID# KSD007482029**

Dear Sir:

Enclosed please find a notification of a plant change, as required by Occidental Chemical Corporation's RCRA hazardous waste permit number KSD007482029 per *Section 1, I.E.10. Reporting Planned Changes*. The Wichita plant is planning on reducing the overall volume of the cellar for Deep Well #3 located near Basin #3.

The current cellar is 9' 5 1/4" deep and the intent is to reduce the depth to 4 feet deep. This will allow maintenance activities to be completed in a safe manner and without entering a confined space. The total current volume of the cellar exceeds the necessity of the deep well. The pit will be filled in using compacted sand to 6" beneath the desired level and then capped with a 6" concrete slab. The slab will have #5 dowels spaced at 18" centers and will be epoxied 4" into the pit wall and extend 4" into the cap slab. A drawing and details for filling in the sump is attached for your review.

If you have any questions, please call Lisa R. Thurman at 316/529-7204.

Sincerely,

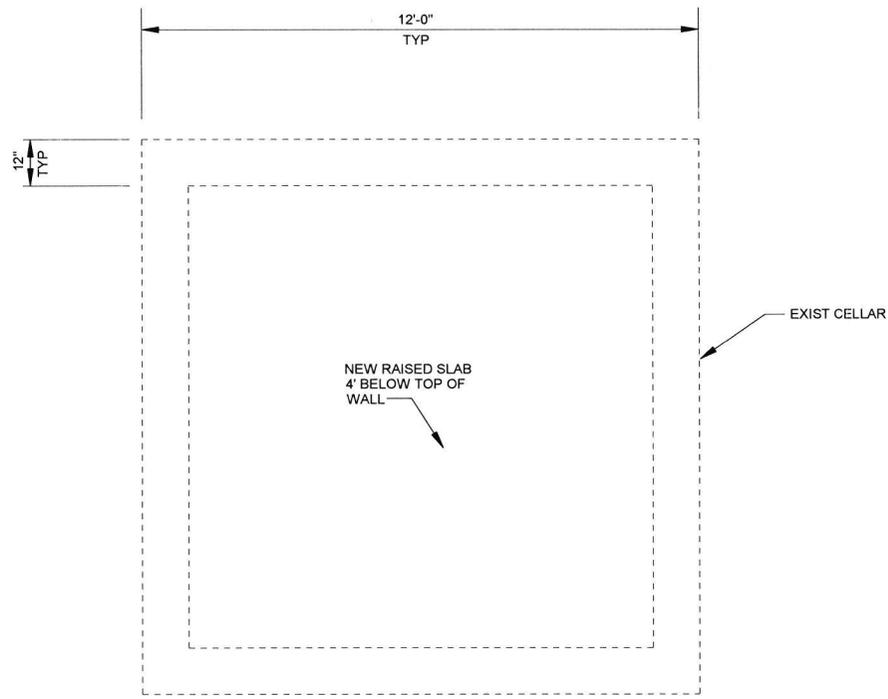

Lisa R. Thurman  
Environmental Engineer
